EDUCATION

The University of Central Florida

B.A. Information Technology

Orlando, FL

Aug. 2024 –

The University of South Florida

B.A. Computer Science

Tampa, FL

Aug. 2022 - May. 2024

EXPERIENCE

Classroom Support Technician

University of Central Florida

Oct. 2025 – Present

Orlando, FL

- Support over 50+ classrooms daily equipped with advanced audio-visual and presentation systems across the downtown campus.
- Conduct daily equipment testing and troubleshooting, ensuring 100dozens of faculty and staff weekly with live technical issues, maintaining minimal downtime during lectures.
- Manage and respond to incident tickets via the OIR system, documenting resolutions to improve response efficiency. While collaborating with a team of 10+ technicians to deliver consistent, customer-focused IT support for classroom technology.

Software Engineering Fellow

Headstarter AI

Aug. 2024 – Jul. 2025

Remote

- Selected to join a competitive fellowship program focused on software engineering and AI.
- Completing 10–15 hours/week of structured training in Python, software development, and applied AI.
- Advancing technical skills through weekly coding challenges and industry-style project simulations.

TECHNICAL PROJECTS & CERTIFICATIONS

Outamation – AI-Powered Workflow Automation Externship | *Extern*

Dec. 2025

- Developing automation scripts in Python and Natural Language Processing (NLP) to process and extract insights from unstructured documents.
- Applying workflow automation concepts to simulate enterprise IT environments and streamline data handling tasks.

CompTIA Sec+ | *Currently in progress*

Jan. 2026

- Currently preparing for the CompTIA Security+ certification to strengthen core knowledge in threat analysis, network security, and risk management.

Cybersecurity Homelab | *Project*

Jun. 2025

- Installed and configured Active Directory and created test user accounts to explore domain management and access control.
- Built a cybersecurity homelab using VirtualBox with Kali Linux, Ubuntu Server, and Windows Server to simulate enterprise network environments.
- Created documentation including a network diagram and security report showcasing findings.

Weather App API | *Python*

Aug. 2024

- Created a Weather App using a Python API that retrieves real-time weather data.
- Integrated the API by writing code that sends HTTP requests to a weather service, processes the response, and displays current weather conditions like temperature and humidity directly in the app.

PROFESSIONAL DEVELOPMENT

BNY Mellon – Knight Shadow Program Participant | *Software Engineering Observation*

Dec. 2025

- Selected as a participant in UCF's competitive matched single-day job shadow program hosted at BNY Mellon's Lake Mary, FL campus.

Electronic Arts - Software Engineering Job Simulation Certificate | *Forage*

Jun. 2025

- Completed a real-world simulation where I worked through debugging, feature planning, and design implementation as part of a fictional EA dev team.
- Practiced writing clean, efficient code, prioritizing user experience, and communicating with cross functional teams offering insight into EA's engineering culture and game development process.

Goldman Sachs - Software Engineering Job Simulation Certificate | *Forage*

Aug. 2024

- Tackled coding challenges that tested my problem-solving skills during the Goldman Sachs Software Engineering Job Simulation.
- Worked on a system design task where I had to justify my design choices, providing an intense yet rewarding experience that gave me insight into the technical expectations at Goldman Sachs.

ColorStack Member | *Team Collaboration, Leadership, Project Management, Networking*

Oct. 2023 - Present

- Actively engage in a community focused on increasing the representation of Black and Latinx students in computer science through networking, guidance, and career development opportunities as a member of ColorStack.
- Engaged in 15+ career development workshops and team-building events to grow technical and leadership skills.

TECHNICAL SKILLS

Programming & Tools: Java, Python, C/C++, SQL, HTML

Frameworks: Visual Studio Code, Python, Replit, Microsoft Office, Microsoft Word, Github

Languages: English (Fluent), Amharic (Proficient), Tigrinya (Basic), Spanish (Basic)
